

# H070SG

## HOMOPOLYMER FOR CAST FILM APPLICATION

Repol H070SG is a PP homopolymer film grade specially developed for manufacturing of cast films. The grade exhibits very good transparency and stiffness when processed on cast film line. The grade can be used for manufacturing of general purpose as well as metallized films.

### Typical Characteristics

Property	Test Method	Unit	Typical Value*
Melt Flow Rate (230oC/2.16 kg)	ASTM D1238	gm/10 min	7.0
Density	ASTM D792	g/ cc.	0.90
<b>FILM PROPERTIES (CAST FILM)</b>			
Tensile Strength at Break (MD / TD)	ASTM D882	MPa	42 / 38
Elongation at Break (MD / TD)	ASTM D882	%	500 /550
Haze – 20 μ / 40 μ	ASTM D1003	%	0.7 / 1.3
Gloss @ 20 °	ASTM D2457	GU	90
Coefficient of friction (St / Kn)	ASTM D1894	---	> 0.7

\* Typical values. Not to be taken as specifications

\*\* Mechanical properties are on 40 mic. Film processed on cast film plant with chill roll temperature of 20 deg. C.

Note: Final film properties are strongly influenced by the processing conditions.

### Typical Processing Conditions

Extrusion temperatures: 210 – 250 °C

### Applications

Cast films for Food packaging, textile packaging, Lamination, stationary etc.

## Regulatory Information

The product complies with Indian Standard IS 10910 on “Specification for polypropylene and its copolymers for safe use in contact with foodstuffs, pharmaceuticals and drinking water. It also conforms to IS 16738:2018 on positive list of constituents for polypropylene, polyethylene and their copolymers for its safe use in contact with foodstuffs and pharmaceuticals. The grade and the additives incorporated in it also comply with the FDA:CFR Title 21,177.1520, Olefin polymers

## Storage Recommendations

Bags should be stored in dry / closed conditions at temperatures below 50°C and protected from UV / direct sunlight

## DISCLAIMER

*The information contained herein may include typical properties and processing parameters of the grade or its typical performances when used in respective applications. The values given above are based on analysis of representative samples and not the actual product supplied. It is the customer's responsibility to inspect and test our grades in order to satisfy itself as to the suitability of the products for customers' particular application.
