## **Technical Data Sheet**

# Pro-fax HP525J

Polypropylene, Homopolymer

## **Product Description**

*Pro-fax* HP525J is a polypropylene homopolymer typically used in the production of biaxially oriented polypropylene films (BOPP). The product is suitable for metallizable film, both as monolayer and in coextruded structures. It contains a standard processing stabilization but does not contain any slip, antiblocking agents and no Calcium Stearate is intentionally added. *Pro-fax* HP525J offers good optical, easy processing and very good film profile. Typical applications are BOPP packaging films and Solid Phase Thermoforming sheets.

# **Regulatory Status**

For regulatory compliance information, see *Pro-fax* HP525J Product Stewardship Bulletin (PSB) and Safety Data Sheet (SDS). To obtain copies of these documents, please contact your LyondellBasell product safety representative.

Status Commercial: Active
Availability North America

**Application** Food Packaging Film; Thermoformed Food Containers

MarketFlexible PackagingProcessing MethodBOPP; Thermoforming

Attribute Good Processability; High Clarity; High Gloss; Homopolymer; Medium Flow

### **Notes**

These are typical property values not to be construed as specification limits.

## **Processing Techniques**

Specific recommendations for resin type and processing conditions can only be made when the end use, required properties and fabrication equipment are known.
