#### **Technical Data Sheet**

# Purell HP671T

Polypropylene, Homopolymer

## **Product Description**

*Purell* HP671T is a nucleated polypropylene homopolymer with a gamma - ray stabilizing additivation for usage in injection molding applications.

Purell HP671T exhibits very high stiffness combined with an excellent transparency.

Purell HP671T is typically used in rigid, high transparency pharmaceutical and diagnostic applications. All potential activities for applications in the pharmaceutical, medical device, laboratory and diagnostics area have to be discussed with the relevant Technical and Business contacts first. To discuss a medical/pharmaceutical application please contact your local Lyondellbasell reference or your local Distributor.

## **Regulatory Status**

For regulatory compliance information, see *Purell* HP671T <u>Product Stewardship Bulletin (PSB) and Safety Data Sheet (SDS)</u>.

Status Commercial: Active

Availability Africa-Middle East; Asia-Pacific; Australia and New Zealand; Europe; North America;

South & Central America

Application Diagnostic Applications; Healthcare Applications; Labware; Medical Devices;

Syringes

Market Healthcare

Processing Method Injection Molding

Attribute Autoclavable; E-Beam Sterilizable; Ethylene Oxide Sterilisation; High Stiffness;

Homopolymer; Medium Transparency; Radiation Sterilizable

Typical Properties         Value         Units         Test Method           Physical         Melt Flow Rate, (230 °C/2.16 kg)         55 g/10 min         ISO 1133-1           Density, (23 °C)         0.90 g/cm³         ISO 1183-1           Mechanical           Tensile Modulus         1900 MPa         ISO 527-1, -2           Tensile Stress at Yield         39 MPa         ISO 527-1, -2           Tensile Strain at Break         16 %         ISO 527-1, -2           Tensile Strain at Yield         7.5 %         ISO 527-1, -2           Impact         Charpy Impact Strength - Notched, (23 °C, Type 1, Edgewise, Notch A)         2.6 kJ/m²         ISO 179           Hardness           Ball Indentation Hardness, (H 358/30)         72 MPa         ISO 2039-1           Thermal
Melt Flow Rate, (230 °C/2.16 kg)       55 g/10 min       ISO 1133-1         Density, (23 °C)       0.90 g/cm³       ISO 1183-1         Mechanical         Tensile Modulus       1900 MPa       ISO 527-1, -2         Tensile Stress at Yield       39 MPa       ISO 527-1, -2         Tensile Strain at Break       16 %       ISO 527-1, -2         Tensile Strain at Yield       7.5 %       ISO 527-1, -2         Impact         Charpy Impact Strength - Notched, (23 °C, Type 1, Edgewise, Notch A)       2.6 kJ/m²       ISO 179         Hardness         Ball Indentation Hardness, (H 358/30)       72 MPa       ISO 2039-1
Density, (23 °C)       0.90 g/cm³       ISO 1183-1         Mechanical         Tensile Modulus       1900 MPa       ISO 527-1, -2         Tensile Stress at Yield       39 MPa       ISO 527-1, -2         Tensile Strain at Break       16 %       ISO 527-1, -2         Tensile Strain at Yield       7.5 %       ISO 527-1, -2         Impact       Charpy Impact Strength - Notched, (23 °C, Type 1, Edgewise, Notch A)       2.6 kJ/m²       ISO 179         Hardness         Ball Indentation Hardness, (H 358/30)       72 MPa       ISO 2039-1

Tensile Strain at Yield 7.5 % ISO 527-1, -2  Impact  Charpy Impact Strength - Notched, (23 °C, Type 1, Edgewise, Notch A)  Hardness  Ball Indentation Hardness, (H 358/30)  72 MPa ISO 2039-1
Impact Charpy Impact Strength - Notched, (23 °C, Type 1, Edgewise, Notch A)  Hardness Ball Indentation Hardness, (H 358/30)  72 MPa ISO 2039-1
Charpy Impact Strength - Notched, (23 °C, Type 1, Edgewise, Notch A)  Hardness  Ball Indentation Hardness, (H 358/30)  2.6 kJ/m²  ISO 179  ISO 2039-1
Edgewise, Notch A)  Hardness  Ball Indentation Hardness, (H 358/30)  72 MPa ISO 2039-1
Ball Indentation Hardness, (H 358/30) 72 MPa ISO 2039-1
Thermal
Vicat Softening Temperature, (A50) 155 °C ISO 306
Heat Deflection Temperature B, (0.45 MPa, Unannealed) 105 °C ISO 75B-1, -2
Optical
Haze, (1 mm - injection molded disc)  18 %  ASTM D1003
Gloss, (45°) 125 ASTM D2457

LyondellBasell Technical Data Sheet Date: 10/8/2022

#### **Notes**

These are typical property values not to be construed as specification limits.

#### **Further Information**

# Health and Safety:

The resin is manufactured to the highest standards, but special requirements apply to certain applications such as food end-use contact and direct medical use. For specific information on regulatory compliance contact your local representative.

Workers should be protected from the possibility of skin or eye contact with molten polymer. Safety glasses are suggested as a minimal precaution to prevent mechanical or thermal injury to the eyes.

Molten polymer may be degraded if it is exposed to air during any of the processing and off-line operations. The products of degradation may have an unpleasant odor. In higher concentrations they may cause irritation of the mucus membranes. Fabrication areas should be ventilated to carry away fumes or vapours. Legislation on the control of emissions and pollution prevention should be observed.

The resin will burn when supplied with excess heat and oxygen. It should be handled and stored away from contact with direct flames and/or ignition sources. While burning, the resin contributes high heat and may generate a dense black smoke.

Recycled resins may have previously been used as packaging for, or may have otherwise been in contact with, hazardous goods. Converters are responsible for taking all necessary precautions to ensure that recycled resins are safe for continued use.

For further information about safety in handling and processing please refer to the Safety Data Sheet.

#### Conveying:

Conveying equipment should be designed to prevent production and accumulation of fines and dust particles that are contained in polymer resins. These particles can under certain conditions pose an explosion hazard. Conveying systems should be grounded, equipped with adequate filters and regularly inspected for leaks.

## Storage:

The resin is packed in 25 kg bags, octabins or bulk containers protecting it from contamination. If it is stored under certain conditions, i. e. if there are large fluctuations in ambient temperature and the atmospheric humidity is high, moisture may condense inside the packaging. Under these circumstances, it is recommended to dry the resin before use. Unfavorable storage conditions may also intensify the resin's slight characteristic odor.

Resin should be protected from direct sunlight, temperatures above 40°C and high atmospheric humidity during storage. Higher storage temperatures may reduce the storage time.

The information submitted is based on our current knowledge and experience. In view of the many factors that may affect processing and application, these data do not relieve processors of the responsibility of carrying out their own tests and experiments; neither do they imply any legally binding assurance of certain properties or of suitability for a specific purpose. This information does not remove the obligation of the customer to inspect the material on arrival and notify us of any faults immediately. It is the responsibility of those to whom we supply our products to ensure that any proprietary rights and existing laws and legislation are observed.
